### DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed April 30, 2007 are acknowledged.
2. Examiner acknowledges amended claims 1-5.
3. Examiner acknowledges cancelled claims 6-10.
4. The rejection of claims 1-3 and 6-8 under 35 U.S.C. 102(b) as being anticipated by Sakon et al., U.S. Patent Number 5,077,142 is overcome by applicant's amendment.
5. The rejection of claims 4 and 9 under 35 U.S.C. 102(b) as being anticipated by Xie et al., U.S. Patent Number 5,989,737 is overcome by applicant's amendment.

### *Double Patenting*

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1774

7. Claims 1-5 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-8 of copending Application No.

10/525,622. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite an organic light emitting device comprising an organic layers disposed between an anode and a cathode wherein at least one of the organic layer comprises a compound represented by

wherein  $m+n$  is an integer from 0 to 10, provided that  $m+n$  is an integer from 4 to 10 when each  $X_1$  to  $X_3$  is a direct bond, and at least one compound selected from the group consisting of formula (2), (3), (4), (5) and (6). The co-pending application recites  $X_3$  whereas the pending

application recites . The co-pending application recites that  $X_3$  can represent an aryl group. An aryl group can include aryl groups with substituents such as amino groups. The co-pending application is generic and encompasses the formula (1) of the present claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Arguments***
